

Progut®

Feed ingredient for domestic animals

- is processed from whole brewery yeast (*Saccharomyces cerevisiae*) with a patented (EP 1387620) hydrolysis process
- contains both yeast cell wall and extra parts
 - includes high amount of soluble and bioactive particles
- deactivated yeast has no negative impact from pelleting process
- is effective to agglutinate pathogens in the intestine
- supports natural immunity and modulate gut microflora
- modes of action are well documented
- to support health and productivity of animals

Feeding instructions:

Piglets, pre-weaning and two weeks post weaning	2-3 kg/t of feed
Older pigs (2 weeks post weaning to 25 kg live weight)	1-2 kg/t of feed
Sow, one week before farrowing and during lactation	1,5 kg/t of feed
Poultry at starter period and layers	1 kg/t of feed
Poultry at grower and finisher period	0,5 – 0,75 kg/t of feed
Calves	2 kg/t of feed
Can be used also in other feeds for animals	

Ingredients:

Saccharomyces cerevisiae, sodium phosphate, extracts from barley and barley malt

Chemical properties:

Moisture 5 %, Crude protein 35,5 %, Crude fat 2,0 %, Crude fibre 0,2 %, Ash 22,5 %, Non-fibre extracts 37,8 %

Physical properties:

Free flowing fine powder, Volume weight 0,75 kg/l

Storage:

Minimum shelf life 24 months.

Packaging:

Net / kg	Pcs / pallet	Kg / pallet
25	30	750
750	1	750
