

StallClean Profi D

SCOPE OF APPLICATION

StallClean Profi D is a liquid, high-alkaline special foam cleaner for animal stalls/sheds and is especially suited to the removal of stubborn dirt comprising excrement, fat and albumen.

StallClean Profi D remains particularly suitable for cleaning in abattoirs and cutting and processing facilities in the meat and fish industries and for removing smoke resin films in smoking plants.

StallClean Profi D can still be recommended for the professional removal of complex impurities consisting of fat and albumen on the one hand, and limescale and water hardness scale on the other, particularly in dairies and the food and drinks industry.

StallClean Profi D is not suitable for cleaning motor vehicles.

PROPERTIES

- > pH 12.5
- special foam structure: better grip and impact on vertical smooth surfaces than comparable foam products
- suitable for all water hardness levels
- very effective emulsification => leading to excellent removal of fats and proteins
- very effective removal of smoke resin films
- efficient and lasting cleansing
- very easy to rinse off

RECOMMENDED APPLICATION

- In the soaked stall/shed that has been given an initial pre-cleansing, a 2-5 % (depending on the intensity of dirt involved) basic solution of *StallClean Profi D* and water is applied to all floor and wall surfaces, fittings and equipment.
- Reaction time: up to 30 minutes (do not allow to dry out on the surfaces).
- After the reaction time has ended, wash out the stall/shed thoroughly with an HD cleaner.

Information on how to prepare a basic solution:

- Use only clean containers made from plastic
- Get water ready in a receptacle
- Add active substance concentrate
- Stir well with a clean implement made from plastic

CHEMICAL STRUCTURE

StallClean Profi D is a combination of soaps and tensides

MATERIAL COMPATIBILITY

StallClean Profi D is not suitable for cleaning aluminium.

StallClean Profi D is not suitable for cleaning motor vehicles.

PACKAGING

22 kg can and 230 kg drum

Protective clothing, including thick protective goggles and a breathing mask, is essential when carrying out all cleaning and disinfection measures. Store cleaning agents and other disinfectants out of the reach of children and unauthorised persons. Do not mix with other chemical active substances (e.g. disinfectants or other cleaning agents).

**USE CLEANERS SAFELY.
ALWAYS READ THE LABEL AND PRODUCT INFORMATION BEFORE USE.**
